

*If you are experienced and passionate about building strong partnerships between IT and business, we want you to be our next colleague. You will have the chance to be a main partner and to contribute on important projects, to be part of a team who grows day by day and to improve the overall experience of the team regarding IT projects.*

## **To perform in this role, we would like you to have:**

- Bachelor degree in Engineering or Economics or equivalent experience – it's important to know the fundamental theories that guide a proficient Business Analyst, but we cherish even more your hands-on experience;
- Exposure to IT and/or banking field – as you will interact with both you must understand their needs, way of work and specificity;
- Agile and/or Waterfall methodologies experience – in the end, you will work based on this models;
- Intermediate level SQL knowledge and/or experience in Web Services testing is definitely an advantage;
- Communication and empathy as your well known languages – this mix will be one of your critical asset in building those strong partnerships;
- The capacity to structure every discussion, idea, project – because every team needs a clear goal, process and methodologies;
- People orientated attitude, ability to work well under pressure and to handle multiple projects and deadlines – yes, it's not easy to be our Business Analyst, but will definitely be rewarding;
- Flexibility in seeing situations from different angles, creative in overcoming different milestones – it won't be an easy journey but it's going to be worthy;
- Autonomy in day to day work , in performing requirements analysis – as you will play an important role aligning people with technology;
- A big desire to learn new technologies, the banking sphere, to meet and help new and awesome colleagues – this is a big part of your job.

## **If you'll join our team, you will be in charge of:**

- Representing a single point of contact for business and IT;
- Providing support for business line representatives to identify technical and business requirements and to standardize these requirements;
- Providing coaching and training for writing technical and business requirements;
- Performing classification of requirements;
- Providing support for targeting them on the correct flow for approval/implementation;
- Finding the best technical solution for business requirements;

# BUSINESS ANALYST (CONSTANȚA)

- Drawing and implementing the necessary templates for collecting/writing technical and business requirements;
- Assuring the quality of documents written/transmitted to technical areas (quality check);
- Participating in design workshops to mediate and facilitate the clarification of technical and business requirements.

## For your effort and dedication, we offer a benefit mix:

- Attractive benefits package;
- The chance to get yourself noticed in a smart team, part of one of the biggest banks in Romania;
- The opportunity to work with people that are passionate about innovation and business evolution;
- Personal and professional development trainings and courses;
- Working environment and team that will make you enjoy the time spent at the office;
- Multiple online and offline benefits from our partners, nationwide;
- Other benefits that make us one of the most wanted company to work for, in Romania.
