SENIOR .NET DEVEL OPER (CONSTANȚA)

Innovation. Disruption. Continuous optimization. Customer centricity.

If you believe those terms should define today's financial ecosystem, we would like to have you in our team at Banca Transilvania.

What we offer:

- The opportunity to work for an innovative product;
- Attractive benefits package;
- The chance to work with people that are passionate about innovation and business evolution, determined to change the way we do banking today;
- Personal and professional development trainings and courses;
- Working environment and team that will make you enjoy the time spent in the office;
- Access to the latest technologies;
- Multiple online and offline benefits from our partners, nationwide;
- Helpful insights for the financial system domain;
- After work recreational activities, together with the team;
- Other benefits that make us one of the most wanted company to work for, in Romania.

To perform in this role, we would like you to have:

- Bachelor's degree in computer science or relevant experience –it's important to know the fundamental theories that guide a proficient developer, but we cherish even more your hands-on experience;
- Experience in development using .NET Framework and .NET Core;
- Strong experience with applied SOLID principles and design patterns in previous projects;
- Strong experience with a .NET unit testing framework;
- Strong understanding of Oracle or MSSQL database servers;
- Experience with build and deploy pipeline for .NET based projects.

Nice to have experience with:

- Queuing technology (Kafka, Rabbit MQ);
- Caching/indexing technology (Redis, Elasticsearch);
- Container based tools (OpenShift, Docker, Kubernetes - hosted or cloud);
- Monitoring systems like Prometheus, Grafana, Kibana (elk, efk).

BT Code Crafters
shape Your future

If you'll join our team, you will be challenged to:

- Work in an innovative environment, develop projects using various technologies;
- Collaborate with cross-functional teams to configure and customize solutions in order to improve and deliver new features;
- Contribute in developing third-party integrations;
- Continuously discover, evaluate and implement new technologies to maximize development efficiency;
- Bring your own ideas and shape them into innovative working solutions.

Let's discuss the rest during the interview :).
